## 5. Cautions

### (1) Soldering Conditions

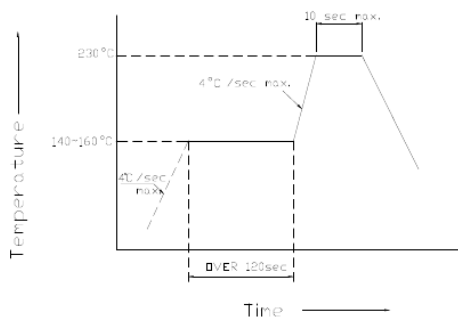

Number of reflow process shall be less than 2 times and cooling process to normal temperature is required between first and Second soldering process.

(Recommended soldering conditions)

	Reflow Soldering		Hand Soldering	
	Lead Solder	Lead-free Solder	Temperature	350°C Max.
Pre-heat	140 ~ 160°C	180 ~ 200°C	Soldering time	3 sec. Max.
Pre-heat time	120 sec. Max.	120 sec. Max.		(one time only)
Peak temperature	230°C Max.	260°C Max.		
Soldering time	10 sec. Max.	10 sec. Max.		

(Lead Solder)

(Lead-Free Solder)

(Recommended Soldering Pattern)

(Units:mm)

### (2) Static Electricity

It is recommended that a wrist band or an anti-electrostatic glove be used when handling the LEDs.

All devices, equipment and machinery must be properly grounded.

Damaged LEDs will show some unusual characteristics such as the forward voltage becomes lower, or the LEDs do not light at the low current. Criteria : ( $V_F > 2.0V$  at  $I_F = 0.5mA$ )

### (3) Moisture Proof Package

---

It is recommended that moisture proof package be used .

(4) Storage

Before opening the package ,The LEDs should be kept at 30°C or less and 70%RH or less. The LEDs should be used within a year.

(5) After opening the package, The LEDs should be soldered within 24 hours (1days) after opening the package. If unused LEDs remain, they should be stored in moisture proof packages, such as sealed containers with packages of moisture absorbent material (silica gel).

If the moisture absorbent material (silica gel) has faded away or the LEDs have exceeded the storage time, baking treatment should be performed using the following conditions Baking treatment : more than 12 hours at  $75 \pm 5^{\circ}\text{C}$ .

(6) Label details:

## 6. PACKAGING

- (1) The LEDs are packed in cardboard boxes after taping.
- (2) Taping Specifications (Units:mm)

- (3) Reel Dimension

PACKAGE: 3000Pcs/Reel

- (4) The label on the minimum packing unit shows ; Part Number, Lot Number, Ranking, Quantity.
- (5) Keep away from water, moisture in order to protect the LEDs.
- (6) The LEDs may be damaged if the boxes are dropped or receive a strong impact against them. so precautions must be taken to prevent any damage.
