

Heavy-duty Wire Cutting and Stripping Machine CS05

Feature

- The CS05 is for BV/BVR wire up to 25mm² in cross-section, multi-core cable up to 12mm in O.D.
- Powerful hybrid stepper motor and 8 rollers transfer the cable and strip off jacket smoothly and precisely.
- User-friendly interface and 7" color touch screen make the program and operation very easy.
- Roller raising function, which brings long stripping length up to 250mm at right side, 120mm at left side.
- Meanwhile it can keep the accuracy and stability of cutting length.
- Data center stores 100 programs to meet the need of small batch sizes and various wire types.
- Pneumatic device to raise left rollers, make heavy-duty wire loading much easier.
- Powerful stepper motor, integrated control board, mute subdivision driver, offers long service life and precise processing.
- CE-Conformity: the CS05 complies with CE equipment guidelines relative to mechanical and electrical safety and electromagnetic compatibility.

Technical Parameter

Model	CS05 Heavy-duty Wire Cutting and Stripping Machine
Wire Range	Wire: 0.1-25mm ² in cross-section; Multi-core cable: 12mm in O.D
Maximum Stripping Length	Tail Strip(Left) 120mm, Lead Strip(Right) 250mm
Strip Length Increment	0.1mm
Cutting Length (L)	0.1-9999mm
Cutting Length Tolerance	0.002 x L
Production Rate	1000-4000 pcs/h
Display	7" Color touch screen, English/Chinese
Memory Capacity	100 programs
Wire Transfer	8 Wheels
Air Supply	0.4-0.7MPa (clean and dry compressed air)
Power Supply	AC220V ,50/60Hz
Dimensions (LxWxH)	640x980x485mm
Weight	65KG
