

Multi-core Cable Cutting and Stripping Machine CS06

Feature

- Exclusively designed, automatic cut and strip machine for multi-conductor cables.
- All the data are programmable easily via color touch screen, such as cutting length, stripping length, batch volume, cut speed, strip speed, etc.
- Data center stores 100 programs for invocation in the future, meet various production needs.
- Powerful motor, 6 rollers driven system and rollers raising function bring precise cutting and stripping, without damaging the underlying cable layers.
- Solid, powerful machine process thick, tough, soft and thin insulation materials. High performance and long service life in different environments.
- CE-Conformity: the CS06 complies with CE equipment guidelines relative to mechanical and electrical safety and electromagnetic compatibility

Technical Parameter

Model	CS06 Multi-core Cable Cutting and Stripping Machine
Function	Round multi-core cable, outer jacket stripping. Flat multi-core cable, double layer stripping. Length modification, wire lack detection, full/partial/middle strip.
Wire Range	Multi-core Cable: 10mm in O.D.
Maximum Stripping Length	Tail Strip (Left): 70mm, Head Strip (Right): 250mm
Strip Length Increment	0.1mm
Cutting Length (L)	0.1-9999mm
Cutting Length Tolerance	0.002 x L
Maximum Mid-Strip No	13
Production Rate	1500 pcs/h
Memory Capacity	100 programs
Air Supply	0.4-0.7MPa (clean and dry compressed air)
Power Supply	AC220V ,50/60Hz
Dimensions (LxWxH)	530x750x370mm
Weight	43KG
